ARIZONA CORPORATION COMMISSION
DOCUMENT CONTROL

Commissioners,
Renewable energy sources must be promoted and the voluntary program in place since 1994 has failed to deliver adequate results. I am in support of the Solar and Environmentally Friendly Portfolio Standard and am willing to pay more than 50 cents per month to fund the Portfolio Standard.

Nigel Sparks
409 W. Pine Ave

Subject: Development of Renewable Energy in Arizona (code 19Y)

Dear Arizona Corporation Commission Members:

It has come to my attention that you are considering a proposal to adopt standard that would require that 1% of all electricity sold by 2005 come from clean, renewable energy sources. I strongly support such a proposal and would gladly take a modest increase in my utility rates to fund the development of renewable energy resources in our state. With our abundance of sunshine, I would think that solar energy development would be a sure thing.

I want you to know that I am in favor of the Solar and Environmentally Friendly Portfolio Standard that your are considering and want to be counted in the ranks of Arizona citizens who support such a plan.

Sincerely, Steven Rodney, Tucson, Arizona

Subject: Solar and Environmentally Friendly Portfolio Standard

To: Mr. J. Kunasek, Chair
Arizona Corporation Commission

I was amazed 13 years ago, when I came to Arizona, that solar energy was not a major player in energy production. After all, we have THE sunniest skies in the nation.

I urge you and the commission to support, as I do, the development of clean solar energy. I would gladly pay much more than \$.50 as my share for promoting the development and use of solar power.

Sincerely,
Peggy Wenrick

From: "John R. Spencer" <spencer@lowell.edu>
To: CC.UTIL(mailmaster)
Date: 4/20/00 1:41pm
Subject: Solar and Environmentally Friendly Portfolio Standard

Dear Carl J. Kunasek, Jim Irvin, and William A. Mundell:

We are writing to support the Portfolio Standard (code 19Y) that would require 1% of all electricity sold in Arizona to be from solar and other renewable energy sources. Global warming is a serious threat to our planet and solar energy could be an important part of the solution to this threat. Arizona is ideally placed to take a lead in this field, and the proposed standard would help move us in that direction.

We would be happy to pay the extra 50 cents per month utility bills to help make this happen, and we suspect that many Arizona citizens would feel the same way.

Best wishes,
John and Jane Spencer

Subject: Solar and Environmentally Friendly Portfolio

Dear Mssrs. Kunasek, Irvin, Mundell:

Arizona should be the "incubator" for the growth of solar energy and I support the 1% requirement and am willing to pay the small amount levied per household to lessen our reliance on fossil fuels.

Subject: Solar & Environ. Friendly Portfolio

I SUPPORT the above portfolio and am willing to pay 50 cents/month.
Voluntary program has been ineffective.

COAL COMPANIES' impact life too much, because:

- a) Affluents toxic to Native Americans at Shiprock and elsewhere
- b) Too chintzy to use maximum effective scrubbers, which should be mandatory for all life and environment
- c) Rivers are polluted where applicable
- d) Humanity's and habitat's well-being is priority, not corporation's political muscle
- e) Affluents included in those that are opening holes in ozone layer, threatening planet cultures and environment.

MINING COMPANIES impact the following for personal and business gains only:

- a) Ravage the land, viewsheds, habitats
- b) Cause erosion and original vegetation that never can be fully restored, even where there is a restoration program in place but not to occur until YEARS LATER after surface destroyed.
- c) Tailings affect rivers

These practices do not justify the State capitulating to their political muscle
to oppose ANY efforts along environmental-friendly lines that could sustain life on a planet and create jobs in alternative energy direction.

SUGGESTION:

To offset their lobbying efforts, staff might check into these companies' non-polluting efforts or offenses as mentioned above as ammunition against their self-centered protests of even one measly percent being solar and environmentally-friendly energy generation!

Subject: solar energy

I am a taxpayer and 30 yo guy who totally supports solar energy and thinks that AZ should lead the way!!!

I have to mention code 19Y and just say that I would pay a lot more than a 50 cent increase a month or whatever to know that some of my electricity was coming from solar.

I support promoting development of renewable energy in Arizona. I am currently a Solar Partner with APS which means I pay an extra few dollars a month to help build solar facilities in Arizona. I am certainly willing and ready to pay another 50 cents a month to help fund the Solar and Environmentally Freindly Portfolia Standard. Please implement this plan.

Sincerely,

Mimi Murov

Subject: Solar and Environmentally Friendly Portfolio!

To the Arizona Corporation Commission!

We must promote the development of renewable energy in Arizona;
The voluntary program that has been in place since 1944 has
failed to deliver;

I personally support the Solar and Environmentally Friendly
Portfolio Standard;

I am very willing to pay 50 cents a month more to fund the
Portfolio Standard.

Yesterday, one of the best and most knowledgeable of Solar men in
Arizona passed away, never having seen Solar Power be accepted as a real
source of energy (as it should be), in this state where
the sun shines over 300 days a year. Do NOT let BOB LARSENS' death be in
vain...PLEASE!!!!

Subject: solar energy

Dear Arizona Corporation Commission members, I wish to encourage you to consider the promotion of renewable energy in Arizona. If we require a small amount of our electricity to come from solar sources we will encourage an alternative experiment with potential of great return in the future for our children. To be so beholden to fossil fuels as our major energy source without trying new avenues is a poor business practice. If eventually this increases we can improve air quality, reduce pollution, create new jobs. I urge you to vote for the Solar and Environmently Friendly Portfolio Standard. Sincerely, Paula Nadell
